FOR A CARNIVAL OF COLOR

Floribunda or large flowered cluster roses are noted for low bushy habit of growth, permanence and continuity of bloom. Use mass plantings for hedges, foundation plantings, along walks, borders and should be planted about 14 inches apart. They are versatile, easy to grow, and provide a truly breath-taking display of continuous blooms from early spring until frost.

Malmo Climbing Roses

FOR HIGH COLOR

CLIMBING ROSES are perfectly suited to the porch, garden wall, the fence, or as a specimen on a trellis, on garden pillars, against the summer house or other building.

To prune climbing roses: Climbers when planted should have all stems removed at the ground except the 2 or 3 strongest. These should not be cut back, except the twigs, as climbers bloom only on last year's growth.

Pruning climbers in subsequent years should be done by leaving only the strongest canes of the current year's growth, removing at the ground the two-year canes that have bloomed.

LAWN GRASS SEED

The best time to start your lawn, or to repair it, is during the cool weather of early fall. At this time the weather is favorable for the development of domestic grass but unfavorable for most weeds and wild annual grasses. Why not plan now to have a luxuriant lawn that will add so much to the beauty of your home? For new lawns sow 1 lb. of grass seed to 200 sq. ft.; 100 to 150 lbs. per acre. To improve old lawns, half these quantities should be sufficient. We offer several mixtures and separate grasses for various purposes.

Your Lawn Seed Dollar Goes Farther at Malmo's

Let us help you enjoy a better lawn. Professional know-how, plus MALMO'S Lawn Products with good growing weather are a combination that is unbeatable.

Malmo Velvet Lawn Seed

A top quality scientific blend that makes a fine-textured deluxe lawn. Only choice grasses of Creeping Bent, Chewings Fescue, Kentucky Blue in finest quality are used. Formulated in Seattle for Pacific Northwest gardens to assure greatest year-round lawn beauty.

TO OUR CUSTOMERS:

Your request for a Catalog has been received. ~~The reason you have not heard from us before is that~~ we had expected to get out a Spring Catalog but owing to the extreme weather we have had this winter and the damage that has been done to nursery stock, we believe our decision not to get one out was wise.

This does not mean that we will not have nursery stock to sell this spring; our buyers have been in the South for weeks, and as soon as the weather will permit, our shipments will be here and we will have a full line.

Our New Spring roses are now and if you are considering buying roses, we would suggest that you either come or come in and talk with us about them.

We are enclosing herewith that if there are other items in which you are interested, that you either phone or come in to our nursery, and we be pleased to send you a prompt reply to any requests that you make.
